

## Data Backups

*The statistics are many, and they can be really scary: 10% of laptops are stolen annually; a further 15% of laptops suffer a hardware failure; overall, hardware failures account for over 42% of all data loss incidents; a further 30% of data loss is due to user error; over 50% of company data is stored on the workstation.*

*And 60% of business that suffer a major data loss will fail.*

### Don't be a statistic!

The fact is, a serious data loss can mean the end of your business. CPG Systems can offer you a customized solution that can help you restore your lost data, and get you back up and running within minutes of the failure. Whether you have 3 GB of data or 300 GB, we have solutions that will keep your data safe.

### What, where and how

For companies needing full restore capabilities, CPG Systems can provide you with a full bare-metal backup. This means that if your server or computer is totally fried, we can restore the operating system and the data to a recent point in time.

And if you simply need to maintain a copy of your data, we have software solutions that can quickly and easily backup and restore your data. Even have access to your data from anywhere in the world!

All backup options include:

- Off-site storage – if you have a building disaster, your data is safe
- Encryption – your data is unreadable by **anyone** except you. Not even us
- Database backups – SQL, Oracle or Lotus all covered
- Open file backup – keep working while data is protected in the background
- Canadian-based storage – no foreign laws to contend with

[Contact us today](#) to get a free onsite evaluation of your data backup needs!

### Why bother?

- 30% of all businesses that have a major fire go out of business within a year. (Home Office Computing Magazine)
- 31% of PC users have lost all of their files due to events beyond their control.
- 34% of companies fail to test their tape backups. Of those that do, 77% experienced tape failures.
- Companies that aren't able to resume operations within ten days of a disaster are not likely to survive. (Strategic Research Institute)
- Simple drive recovery can cost upwards of \$7,500 and success is not guaranteed.
